

SATYANARAYANA REDDY KOLAGATLA

Data Engineer | ETL/ELT Pipeline Development | BigQuery | Airflow

+91 8639822170 | satyanarayanareddykolagatla@gmail.com | Hyderabad, India | LinkedIn | Portfolio

TECHNICAL SKILLS

Cloud (GCP): BigQuery, Cloud Storage, Cloud Composer (Airflow), Data Fusion (ETL), Cloud KMS (Secret Management), Dataproc, Dataflow, Pub/Sub, Apache Beam, Dataplex, Cloud Build, Cloud Run, Cloud Scheduler, Cloud Monitoring, Cloud Logging, Artifact Registry, Cloud IAM, Discovery Engine (Vertex AI Search)

Languages / DBs: Python, PySpark, SQL, Apache Spark

AI Search & Analytics: Google Cloud Discovery Engine, Enterprise Search, Search Analytics, Catalog Indexing, BigQuery Audit Logs

Infrastructure: Bitbucket, Version Control, Git, Docker, CI/CD, Linux

Data Engineering: Databricks, ETL/ELT Pipelines, Data Modeling, Data Validation, Data Transformation, Incremental Loading, Metadata-Driven Pipelines, Configuration-Driven ETL, Partitioning, Clustering, Data Governance

BI & Analytics: Looker Studio, Tableau, Power BI

WORK EXPERIENCE

Data Engineer | FISClouds Pvt. Ltd.

Nov 2024 – July 2026

Enterprise ODS & Secure ETL Optimization | Banking Client – Financial Sector

May 2025 – July 2026

- Designed and implemented enterprise ODS ETL/ELT pipelines to integrate banking data into BigQuery using Cloud Data Fusion and Cloud Composer.
- Built Landing, Raw, Staging, and Curated data layers with Dataplex-based governance and automated data quality validation.
- Optimized BigQuery storage and query performance using partitioning, clustering, and SQL tuning, improving query execution by **85%** and reducing bytes processed by **up to 99.9%**.
- Developed Tableau dashboards for ETL monitoring, Airflow DAG execution, and operational reporting, providing real-time platform visibility.
- Utilized Cloud Data Fusion to connect on-premises servers with diverse databases (Oracle, MySQL, SQL Server, PostgreSQL) to ingest data into BigQuery.

AI-Powered Enterprise Search & Catalog Data Platform | Telecom Client

Nov 2024 – April 2025

- Designed and developed a **configuration-driven ETL framework** using Python to ingest, transform, and standardize telecom catalog data from multiple sources into **BigQuery** through scalable, reusable pipelines.
- Built **metadata-driven Python transformation pipelines** to normalize complex JSON data, implement business validation rules, and process nested structures while ensuring schema consistency across multiple catalog formats.
- Engineered **BigQuery ingestion pipelines** integrated with **Cloud Storage**, automated data refresh processes, and reusable loading utilities to support scalable, configuration-based data processing.
- Integrated **BigQuery** with **Google Cloud Discovery Engine** to enable AI-powered enterprise search through automated catalog indexing, synchronization, and reusable Python-based document ingestion.
- Developed **BigQuery SQL analytics** to monitor search performance and implemented telecom-specific transformation rules for prepaid, postpaid, broadband, roaming, and rewards catalogs in collaboration with business stakeholders.

CERTIFICATIONS & ACHIEVEMENTS

- Google Cloud Certified: Professional Data Engineer. [link](#)
- Microsoft Certified: Azure AI Fundamentals. [link](#)
- Solved 250+ algorithmic problems on LeetCode | 6-Star Python badge on Hacker Rank.
- Received On-the-Spot Award at FISClouds for delivering critical project milestones.

EDUCATION

B.Tech – Electronics and Communication Engineering

KKR & KSR Institute of Technology and Sciences, Guntur | GPA: 8.5/10

Jun 2020 – May 2024
