

SKILLS SUMMARY

Cloud Platform: Google Cloud (Big Query, Cloud Storage, Composer, Data Fusion, Dataflow, Dataproc, Dataplex)
Data Engineering: ETL/ELT Pipelines, Data Modelling (Star Schema), Terraform, Data Governance
Languages/DBs: Python, FAST API, PySpark, SQL, PLSQL, Oracle
BI & Analytics: Looker Studio, Tableau, Big Query BI Engine, Materialized Views
Tools/DevOps: Bitbucket, GitLab, CI/CD, Excel, power point, VS Code
Soft Skills: Rapport Building, Problem-solving, Excellent communication, Cross-functional collaboration.

WORK EXPERIENCE

Data Engineering | FARIZ INFO SOLUTIONS PVT. LTD Nov 2024- Present

- An IT consultancy specializing in cloud transformations and enterprise data warehousing solutions for global clients.
- Architected and optimized** high-velocity ODS pipelines utilizing **Cloud Data Fusion** and **Dataplex Lakes** to ingest server data into Big Query, leveraging **Terraform** for automated resource provisioning and **Cloud Composer (Airflow)** to ensure 99.9% uptime.
- Engineered robust CI/CD frameworks** via **Bitbucket** and **Cloud Build** to automate cross-environment deployments, integrating **Cloud KMS** for secret encryption and **GCS multi-tier staging** to slash migration errors and operational costs.

PROJECTS

Enterprise ODS & Secure ETL Optimization

- Spearheaded** a large-scale modernization initiative to resolve systemic pipeline failures across **600+ legacy workflows** while enforcing enterprise-grade security and automated deployment protocols.
- Re-engineered and hardened 600+ ETL pipelines** using **Dataflow** and **Data Fusion**, implementing modular architectures and **Cloud KMS** encryption to achieve 99.8% data accuracy and strict regulatory compliance.
- Architected robust CI/CD frameworks via Bitbucket and Cloud Build while** utilizing **Cloud Composer (Airflow)** to automate daily pipeline execution and **job orchestration**, delivering real-time operational intelligence via **Tableau** and **Looker Studio**.

Telecom Customer Data Migration (Cost-Optimized)

- Engineered** a cost-efficient migration framework for massive telecom datasets from on-premises to GCP, strategically bypassing high-overhead managed services to achieve significant budgetary savings.
- Developed high-performance Python DAGs in Cloud Composer (Airflow)** for mission-critical batch orchestration, replacing expensive third-party tools with a custom, scalable ingestion engine.
- Optimized cloud resource utilization** by implementing **incremental load strategies** and multi-tier GCS staging, **slashing storage costs and processing overhead** while guaranteeing 99.9% data integrity.

CERTIFICATIONS & ACHIEVEMENTS

- Google Cloud Certified – Professional Data Engineer.
- 250+ problems on LEETCODE**, focusing on logical Reasoning and problem-solving [Link](#).
- Achieved a **6-star Badge in python problem** solving and programming on Hacker Rank [Link](#).
- Earned **On-the-Spot Award** for meeting client expectations by completing project deliverables ahead of schedule.

EDUCATION

KKR & KSR Institute of Technology and Sciences
Bachelor of Technology in Electronics and Communication with **GPA: 8.5**

Guntur, India
June 2020 – May 2024
